

alumni newsletter

Larson Keso, '55 named 2001 Distinguished Alumnus

Dr. and Mrs. Larson Keso

Each year the Dental Alumni Association names a Distinguished Alumnus, and this year Larson Keso of the Class of 1955, was chosen for this honor. He is being recognized for his many and outstanding contributions in the field of dentistry and especially for his service to his specialty of orthodontics.

Dr. Keso earned a bachelors degree in zoology from Oklahoma State University in 1953. Following his graduation from the School of Dentistry in

1955, he served three years in the U. S. Air Force. He returned to his Alma Mater and earned a masters degree in Orthodontics in 1960. A member of Xi Psi Phi, he had been named Best College Chapter Secretary in 1954. In the years since, he has served on the Volunteer Faculty at the University of Oklahoma Health Science Center since 1960.

He has been President of the Oklahoma County Dental Society and is a Fellow of the

American College of Dentists and also of the International College of Dentists. He was named Dentist of the Year by the Oklahoma Dental Association in 1997. He is a member of Omicron Kappa Upsilon honorary fraternity.

A Diplomate of the American Board of Orthodontics, he was a founding member of the cleft palate team at the University of

Oklahoma Children's Memorial Hospital. Over the past three decades, Dr. Keso has held leadership positions in regional, national and international orthodontic organizations. He is past-president of the American Association of Orthodontists and is currently serving as president of the American Association of Orthodontists'

The 135th Annual Meeting

The Washington Dental Alumni Association held its annual meeting in conjunction with the Greater St. Louis Dental Society's Mid-Continent Dental Congress on September 14 and 15, 2001. The events of this alumni meeting were very well attended considering that many people who were traveling to St. Louis for the occasion had their plans disrupted by the tragedy of September 11, 2001.

The 135th Annual Session began Friday evening with a reception at the Alumni House on the Main Campus. After a well-attended and festive gathering, the classes celebrating their reunions headed off for dinners at numerous locations around St. Louis. The honored classes were the Fifty Five Year Class of (1946), the Fifty Year Class of (1951), the Twenty Five Year Class of 1976, and the Twenty Year Class of 1981.

Early Saturday morning, the Alumni Association's Board of Directors met at the Frontenac Hilton to conduct the annual business meeting. The Finance Committee, the Nomination Committee, the Editors of the newsletter and the

Alumni Development Coordinator gave reports.

A new committee was formed and has been named the Travel Committee. There has been continued interest in exploring ways to organize trips so that Alumni may travel and spend time together. It was decided that the trip for 2002 would be taken in conjunction with a trip already being planned by Washington University Main Campus Alumni travel coordinators. This trip is in May and will explore sections of the Lewis and Clark Exploration. For further information, please see the related article on page 15.

The Directory Committee reported that plans are underway to provide a new and updated Alumni directory with publication dates planned for 2003. Please watch for mailings, which will be requesting updated information.

The Alumni Website was discussed. Please see the related article on this page.

The noon luncheon business meeting was also held at the Frontenac Hilton with a quorum of loyal alumni present. A report of the meeting of the Board of

Directors was given and appropriate action was taken. The slate of new officers was presented and elected. They are:

President:
Dr. Andy Kim '84

President-Elect:
Dr. Gordon Thompson '52

Vice-President:
Dr. Mike Noble '84

Secretary/Treasurer:
Dr. Zora Hanko '84

Editors:
Dr. Jack Gilster '44
Dr. Gail Holcomb '79

The annual Saturday evening banquet was held in the ballroom of the Frontenac Hilton. The reunion classes were recognized with special honors given to the Fifty Year Class of 1951 and the Twenty

Five Year Class of 1976.

This year the Distinguished Alumnus Award was presented to Dr. Larson Keso '55. Dr. Keso was chosen to receive this award because of his many contributions to the field of dentistry and orthodontics. Dr. Keso graciously thanked the Alumni Association for the honor. He also commented about the pride he has felt being a graduate of Washington University School of Dental Medicine.

The banquet concluded with introduction and installation of the new officers. With this, the 135th Annual Meeting came to a close.

WUSDM Alumni Website

A Dental School Alumni Association web page has been set up. The address will be listed at the end of this article. Currently access to our website is only through the full address, but we hope to establish a link through the Washington University home page. The University has assigned a seven-digit number to each Alumnus and this number is need-

ed to access the information. This number is printed above the address on all mailings that we receive from the University. Also, the Alumni Coordinator, Dave Jolley, will be able to help you obtain your personal ID number. Email him at: Djolley@aismail.wustl.edu. The address of the website is: <http://aisweb.wustl.edu/alumni/dentalschool.nsf>

Friday Night Cocktail Reception

Roger Parrott, '53 and Mrs. Neal Newton, '51.

Mrs. Everett Roeder, '51, Richard Campbell and wife, Doxey Sheldon, '79.

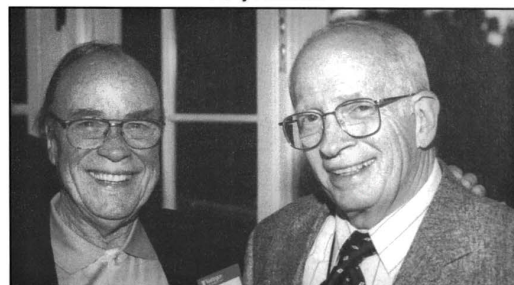

Dr. and Mrs. Arnie Jacobson, '76.

Clint Haynes, '47, Sam Guyer, '52 and Les Kreader, '51, all former faculty members.

Dean Emeritus Selfridge, Nancy and John Durham, '56, John and Mrs. Goin, '56.

Bill Stocker, '46 and Jack Gilster, '44.

Barry Wyman, Larry Hoffman and Karl Hussey, all of the Class of '76.

Mrs. Snitzer, Jules Snitzer, '55 and Roger Parrott, '53.

Friday Night Cocktail Reception Continued

Clifford Neill, '46, Mrs. Neill and Jim Baumann, also '46.

Three from the Class of '51, Jim Lyon, Neal Newton and Everett Roeder.

Dennis Parrott, '78, Karl Hussey, '76 and Barry Wyman, '76.

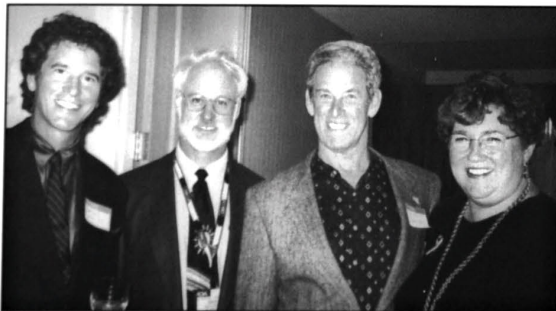

Les Page, '51 and Harold Schreiber, '47.

Mrs. Keso, Bill Brandhorst, '43, Mrs. Brandhorst and Larson Keso, '55.

Talva Grundstrom, '86 and Warren Yow, '83.

Randy Cislo, '82, David Small, '79, Richard Campbell and wife, Doxey Sheldon, '79.

L to R: President Doxey Sheldon, Distinguished Alumnus Larson Keso and former president, John Goin.

Friday Night Cocktail Reception Continued

L to R: Rich Barnum, '61, Joseph Laffler, '61 and Mrs. Laffler.

Dr. and Mrs. Graydon Ballard, '62.

Monica Strong, '73 and Sam Guyer, '52.

David Small, '79, George Coleman, '79, Alumni Representative David Jolley and Kevin Thorpe, '79 behind Dennis Parrott, '78.

Brad Russell, '81, Lee Hill, '81 and Jack Gilster, '44.

Mrs. Baumann, Jim Baumann, '46, Larson Keso, '55 and Bill Stocker, '46.

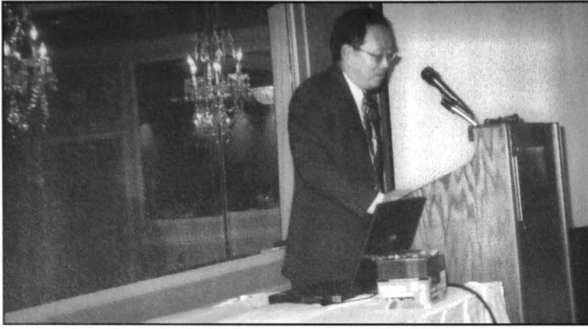

Warren Yow, '83, Andy Kim, '84, Marsha Marden, '90, Zora Hanko, '84 and Randy Cislo, '82.

Linda Winter and Bill Chen, both '76.

Saturday Night Banquet

New President Andy Kim, '84 addresses the Association.

New President Kim presents the Past-presidents plaque to Dr. Sheldon, '79.

Mrs. George Selfridge, John Durham, '56, Mrs. Durham and Mrs. Neal Newton.

Jim Huisinga, '64, Mrs. Selfridge, Mrs. Groves Cooke, Dr. Cooke, '71 and Mrs. Huisinga.

Former Association President Neal Newton, '51, recognizes his classmates, The 50 Year Class.

Dennis Parrott, '78, Marsha Marden, '90, Andy Kim, '84 and Jeff Marden.

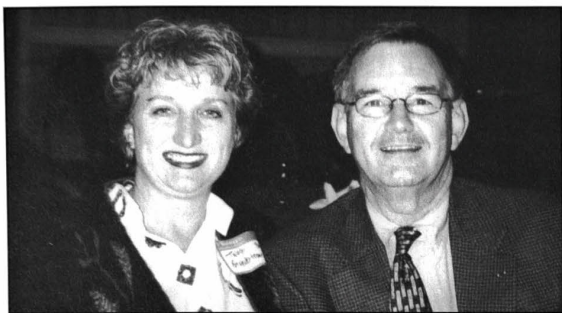

Mrs. Joe Laffler, Mrs. Naomi Davidian and Dr. Laffler, '61.

Classmates and former faculty members Neal Newton and Les Kreader, both '51.

Saturday Night Banquet Continued

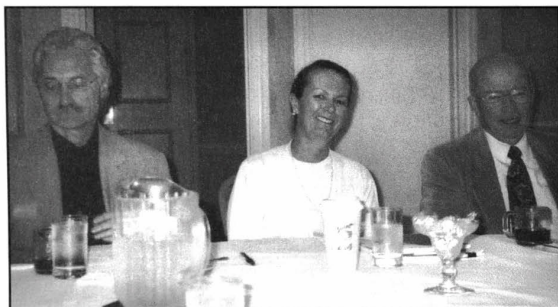

Talva Grundstrom, '86 and former Association president, Kurt Studdt, '66.

Some of the Twenty-five Year Class, L to R: Barry Wyman, Arnie Jacobson, Stephanie Zotos-Houseman and Andy Simonton.

Board of Directors Breakfast Meeting

L to R: Marie Conte, Gail Holcomb and Gordon Thompson.

L to R: David Jolley, Zora Hanko, Jim Huisinga and Roger Parrott.

Don't Miss the 61st Annual Mid-Continent Dental Congress September 19 & 20, 2002

Thursday, September 19, 2002

- PHARMACOLOGY MADE EASY, Michael L. Iczkovitz, DDS
 - IT'S NOT JUST A CLEANING AND CHECK-UP
 - A Team Approach to Reduce Cancellations and Failures
 - Annette A. Linder, BS, RDH
 - OSHA, M. Dean Perkins, DDS, MPH
- ENDODONTICS FOR THE GENERAL PRACTITIONER
- Including Rotary Instrumentation and other New Techniques
- Joe Camp, DDS
- CPR Certification

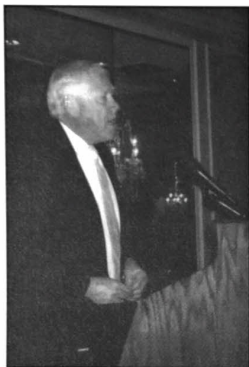

Friday, September 20, 2002

- SMILE MAGIC: BEAUTY SPOKEN HERE!
- Anterior and Posterior Direct Bonded Restorations, Jamie Morgan, DDS
- CREATING THE ULTIMATE DOCTOR-PATIENT HYGIENE EXAM,
- Karen Fulton Davis, RDH, BSDH
- SPEAK FOR YOURSELF WITH POWER AND PRESENCE,
- Karen Cortell Reisman, MS
- PRE-MALIGNANT LESIONS AND ORAL CANCER,
- Sol Silverman, Jr. MA, DDS
- CPR Certification

Additional Speakers to be Announced

Larson Keso, '55 named 2001 Distinguished Alumnus

Continued from page 1

Distinguished Alumnus Keso thanking the Association.

Insurance Company. He is a member of the World Federation of Orthodontists'

executive committee.

In the private practice of orthodontics in Oklahoma City and Edmond, he received the Martin Dewey Memorial Award from the Southwestern Society of Orthodontists in 1997.

Larson Keso has served dentistry and his specialty of orthodontics with energy and distinction and Washington University Dental Alumni Association is proud to count him one of ours.

Alumni Association Dues

Thank you to all alumni who contribute to the Alumni Association with payment of dues each year. Those dues help to fund a number of ongoing events and projects. Our dues allow us to host the Friday evening gathering held during the Alumni Association Annual Meetings, usually in September in St. Louis. We also host a Sunday evening reception at each ADA meeting, which is open to all Dental Alumni. Dues also

pay for the Alumni Directory, which the Alumni Association updates and sends out approximately every five years. The Alumni Association is a supporter of the National Foundation for Ectodermal Dysplasia. We also support the Dental Health Theater in St. Louis, a dental educational theater which hosts 12,000 per year. It is one of a kind facility in the world and we are proud to support this fund and educational resource.

Alumni and School News

Many news items about some alumni and former faculty members appear in a WU publication, "The Record" which is published weekly for the faculty, staff and friends of Washington University. In March, 2001, there appeared a long and laudatory article on Don Huebener, '69, and his work at Children's Hospital. Some excerpts:

"Huebener, professor of plastic and reconstructive surgery at the School of

Medicine and director of pediatric dentistry at St. Louis Children's Hospital, specializes in treating kids with special health care needs. His patients include children with autism, cerebral palsy, cleft lip and palate, AIDS, cancer, heart defects and ectodermal dysplasia – just to name a few. ...

Soon after returning to the Washington University dental school in 1971 to serve on faculty, Huebener and other faculty members formed the Cleft Palate

and Craniofacial Deformities Institute at St. Louis Children's Hospital. As the team took off, so did Huebener's interest in working with children with cleft lip and palate. This interest provided the foundation for his life's work – researching, understanding and providing care for the growth and development of children who have complex oral or facial deformities. ...

Andrew Kim, D.M.D., an attending pediatric

dentist, works with Huebener in the dental suite at St. Louis Children's Hospital. "His patients love him," Kim said. "He has a very loyal following – a lot of longtime patients. He keeps his families incredibly informed, and that makes them feel comfortable." ...

Richard Nissen, D.M.D., a Clayton orthodontist, highlighted Huebener's attention to detail. "He's one of the most meticulous people I know," Nissen

Alumni and School News Continued

said. "He's very exacting, and he really strives to give his patients the very best care." ...

Jeffrey Marsh, MD, the Appoline Blair Professor of Surgery in the School of Medicine, said, "Dr. Huebener's dedication to task, service to the dental care of patients with special health care needs and commitment to academic work and international service make him unique among pediatric dentists." ...

A member of many professional organizations, Huebener recently completed a three-year term on the board of directors of the American Cleft Palate Craniofacial Association. In May, on the eve of his 30th anniversary at the University, he will become president of the College of Diplomates of the American Board of Pediatric Dentistry.

*Article originally written
by Nicole Vines*

Former faculty member, Dr. Phillip Osdoby with his wife Dr. Patricia Collin-Osdoby were the subjects of an article in the July 13, 2001 issue of "The Record".

The "University biologists have discovered a mechanism in blood vessels that opens the door for bone loss in such diseases as rheumatoid arthritis, tumor-associated bone loss, or artificial implant loosening."

Patricia Collin-Osdoby, Ph.D., research associate professor of biology, and Philip A. Osdoby, Ph.D., professor of biology, both in Arts & Sciences, and Linda Rothe, University research associate, have for the first time shown that blood vessels at inflamed sites where bone loss is occurring create signals that set into motion a cascade of events leading to local bone destruction. ...

Studying human tissue and cell samples the Osdobys have shown that two key inflammatory cytokines – interleukin-1 (IL-1) and tumor necrosis factor (TNF) – signal the endothelial cells of blood vessels and capillaries to make and display on their cell surface a molecule called RANKL. RANKL is the critical signal that tells the body to make and activate bone-degrading cells called

osteoclasts. After osteoclasts take bone away, osteoblasts go back in and add new bone. ...

The Osdobys believe that inflamed blood vessels beckon cells to the region, and then initiate their development into highly active bone-degrading osteoclasts.

The researchers also found that in this biochemical chain of events, the blood vessels themselves make an antagonist molecule, osteoprotegerin (OPG), which neutralizes RANKL activity. Although OPG is made in this process, it peaks early and RANKL gets the upper hand. This is aided by the fact that RANKL is tethered on the cell surface while OPG is a soluble molecule that can be carried away by the circulation.

Drug-chemical companies are interested in RANKL as a target and OPG as a possible therapeutic or preventative molecule to eliminate excessive osteoclast formation and activity. It is the progressive and irreversible loss of bone and cartilage that is the most difficult to control and treat in rheumatoid arthritis, periodontal disease

or cancer. Current anti-inflammatory or chemo-therapeutic treatments are inadequate for this purpose. However, OPG injection prevents such bone and cartilage loss without interfering with normal bone remodeling.

Former faculty member, Memory Elvin-Lewis has been the subject of several articles in the last year in the WU "Record". The May 18, 2001 issue:

"Whether Western medicine likes it or not, herbal self-medication has become a part of our everyday existence, and its impact on health cannot be ignored," said Memory Elvin-Lewis, Ph.D., professor of microbiology and ethnobotany in Biomedicine in Arts & Sciences. "For the sake of the patient, reliable data is available through a variety of Internet sources and should be used on a routine basis."

There are among the conclusions Elvin-Lewis reaches in her paper, "Should We Be Concerned About Herbal Remedies?" published in the May issue of the Journal of Ethnopharmacology.

Alumni and School News Continued

Elvin-Lewis raises the point that Western physicians generally have little understanding of herbalism, not to mention self-medicating patients, many of whom also take traditional or "newly evolved" herbal medicines.

In the January 11, 2002 issue of the "Record", Dr. Elvin-Lewis appears again:

Memory P. Elvin-Lewis, Ph.D., professor of microbiology and ethnobotany in bio-medicine in Arts & Sciences, recently was awarded the Martin de la Cruz medal by the Mexican Academy of Traditional Medicine at a ceremony in Mexico City. Elvin-Lewis received the award for her "outstanding work in the field of traditional medicine." Her career in ethnobotany and traditional medicine has taken her to South America, Africa and India, where she has collected and analyzed plants for their potential medical benefit and observed different ethnic uses of plants used for medicine and for oral health.

Elvin-Lewis was one of approximately 400 researchers attending the 15th International

Congress of Traditional and Alternative Therapies, sponsored by the Universidad Autonoma Metropolitana. Elvin-Lewis also presented the conference keynote address, "Therapeutic Evaluation of Hepatitis Remedies: The Usefulness of Ethnomedical Focusing Techniques."

Last year, Elvin-Lewis' husband, Walter H. Lewis, Ph.D., professor of biology in Arts & Sciences and a long-time collaborator of his wife's, also was a recipient of the medal. ...

She also played a role in identifying what is considered by many to be the first death from AIDS in this country in 1969. Elvin-Lewis, who was then studying chlamydial infections, preserved body fluids and tissues of a St. Louis teenage boy who died 1969 from mysterious complications of a severe chlamydial infection. Normally chlamydia is a curable sexually transmitted disease, so this case remained an enigma for some time.

In 1986, after AIDS had taken off dramatically in the United States, a re-analysis of these tissues and fluids proved that the boy

had died of a AIDS, some 15 years earlier than what had been the assumed first U.S. death from the disease in 1984. While the strain of HIV is now considered to be different from that implicated in the present epidemic, this case served to encourage others to look back into to the specimen collections for earlier pre-epidemic cases.

The above articles originally written by Tony Fitzpatrick

The November 30, 2001 issue of the "Record" carried a long article about the "Baby Tooth Survey" of the late 50's and 60's. Dr. Harold Rosenthal, former Dean John Bird and John Gilster were dental school faculty heavily involved in the project. In the article,

"The discovered remnants of a forgotten study begun in the '50's and concluded in 1970 have presented scientists with a research windfall.

Some 85,000 baby teeth, collected from St. Louis children, were found last May in shoeboxes in one of many ammunition bunkers at the University's Tyson Research Center.

The teeth were part

of the world-renowned St. Louis Baby Tooth Survey, conducted from 1959-1970 and spearheaded by then professor of biology in Arts & Sciences Barry Commoner, Ph.D., who became nationally known in the 1970's and '80's for his environmental and political activism.

In the early '60's, when many Americans were building or planning fallout shelters, the public wanted to know if children were absorbing nuclear radiation from above-ground tests in the U.S. Western desert.

The teeth found at Tyson were leftover from the sample never analyzed for evidence of strontium 90, a radioactive material created in atomic-bomb explosions. But now the teeth will give researchers the opportunity to determine whether fallout from Cold War nuclear-bomb tests caused cancer and other health problems years later to those same children, now mostly in their 40's and 50's.

Children or their parents mailed newly fallen baby teeth to the committee along with a

Alumni and School News Continued

form. The forms were handed out at schools, dental offices and even in department stores. Along with the teeth, they sent a card with their name, address, birth date and other information.

Rosenthal led the scientific analysis; his lab tested the teeth for strontium 90.

Created by the bomb blasts, strontium 90 was readily absorbed by the fast-growing teeth and bones of infants. It left a telltale sign of exposure to fallout just before and after birth.

Rosenthal's analysis showed how the stron-

tium 90 in baby teeth rose and fell in unison over the years with bomb tests, declining rapidly after the tests ceased. The study was instrumental in persuading President Kennedy to adopt a 1963 treaty banning atmospheric bomb tests.

Now, researchers in New York want to locate the adults who provided those teeth years ago and see if they've experienced health problems.

Joseph Mangano, national coordinator with the Radiation and Public Health Project, is asking anyone born and living in St. Louis

from the late 1940's through the 1960's, especially if they believe they submitted teeth, to contact his group. If matched with any of the baby teeth, the person would be asked for a mailing address to receive a health questionnaire. This then would be compared with fallout exposure data gained through analyzing each person's baby teeth with radiation counters that are much more sophisticated than those in the past.

So far, nearly 1,000 people have contacted Mangano's group.

Study participants can contact the group

at Radiation and Public Health Project, P.O. Box 60, Unionville, NY 10988; (212) 496-6787; e-mail odiejoe@aol.com; Web site www.radiation.org."

Larry Pawl, '87, was recently installed President of the San Diego Academy of Dentistry.

Dale Cartwright, '54, has asked us to mention that as a result of the recent sudden death of his brother, Roland, their practice is in dire need of an associate. If interested please contact him at P. O. Box 68, Cabool, MO 65689.

Roland Cartwright, Wife Die in Accident

Friends and classmates were saddened to learn of the deaths on January 16, 2002 of Roland Cartwright, '61, and his wife, Marilyn, in an automobile accident.

Roland was a member of the Missouri Dental Association, Springfield Dental Society, Cabool Lion's Club, Missouri State Tree Farm

Association, and the Cabool First United Methodist Church and Choir. Roland was recognized as a master tree farmer. He was a past president of the Missouri Walnut Council and of the Cabool Jaycees. Roland served two terms as a Cabool City Councilman. He served as the president of the Cabool

Planning and Zoning Commission for the past 10 years.

Marilyn was active in the Cabool Art Club and the First United Methodist Church in Cabool. She volunteered for the United Way and at the voting polls during elections. She was a Girl Scout leader as well as a gifted artist.

Roland practiced dentistry with his brother, D. Dale Cartwright, '54, and uncle Dr. Homer Cartwright, and later with his niece, Dr. Terry Cartwright '85. They are survived by their three children, Cynthia, Lawrence and Kristine; son-in-law John Eickhoff; daughter-in-law, Lisa Cartwright and five grandchildren.

Alumni and Development Update from David Jolley

Gifts from alumni and friends supporting the Harriett Steuernagel Library Fund continue to come in to the Medical School Library. The following chart illustrates the gift totals:

Fiscal Year	Fund Market Value	\$ Received	\$ Available to Spend
1998 (1997-98)	\$341,599	\$8,980	\$11,466.25
1999 (1998-99)	\$N/A	\$14,479	\$N/A
2000 (1999-00)	\$1,365,566	\$435,640	\$39,550.48
(included estate gift of \$414,888 from Edward T. Wilson)			
2001 (2000-01)	\$1,423,376	\$13,660	\$67,025.48
2002 (2001-02)	\$1,338,438	\$N/A	\$98,785.81

Funds spent during FY01 to keep Collection current - \$18,680.00

(Funds are used to pay for journal renewal subscriptions and individual purchases of dental titles. Additional money, not spent during a fiscal year is plowed back into the endowment)

The Steuernagel Collection contains approximately 90 titles (magazines/journals) as well as a large collection of dental books and other information for research and reference.

During 2000-01, close to 800 titles were checked out. *(Note: the usage of the Collection is based on the library personnel returning the titles to their sections.)*

Library staff has been exploring additional electronic resources that would enhance the Collection's value and increase its access to outside sources. Additional annual funds available from endowment could be earmarked for these new electronic avenues.

The upcoming Earl Shepard Memorial Lecture is scheduled for April 10, 2002. Scheduled to present is Dr. Terry Ress, Chairman of Stomatology at Baylor Medical Center, Dallas, TX.

The heirs of Dr. and Mrs. Earl Shepard endowed the Dept. of Otolaryngology at WUSM with a fund to endow a lectureship series. In 1994, a sum of \$50,000 was used to establish the endowment. The following chart illustrates the funds \$ history:

(Nov. 5, 1993, the Dental School Alumni Association Executive Committee suggested the total estate funds be disbursed in the following manner: \$50K to establish the Shepard Memorial Lecture Series \$56,465 to benefit the Steuernagel Library Fund \$10K to the Memorabilia Display

Fiscal Year	Fund Market Value	\$ Available to Spend
1998 (1998-99)	\$75,735	\$2,519
2000 (1999-00)	\$99,272	\$3,797
2001 (2000-01)	\$102,997	\$3,752
2002 (2001-02)	\$95,551	\$3,646

The WU School of Dental Medicine memorabilia display is available for viewing at the former school location on Scott Avenue. The display is located in the newly refurbished building that now houses the departments of neurology, psychology, internal medicine and pathology. The plaques of the former deans as well as text on the history of the School are on display.

A Dental School Alumni Association web page has been established. Currently, the access is through a full address (no link has been established through the WU page)

<http://aisweb.wustl.edu/alumni/dentalschool.nfs>

You can access the WU homepage once you get into this dental alumni page.

Dental school faculty, alumni and friends (Harold Schreiber - organizer) continue to meet for lunch at Whittemore House the 4th Thursday in each month.

The Missouri/Illinois study club, a group of former Dental School faculty members, meets monthly for 2 hour continuing education seminars on the second Wednesday at noon at the Junior League (Clayton Rd. west of Lindbergh). Guests are welcome. For further information, contact Dr. Arnie Jacobson or Dr. Mario Conte.

Class Reunions

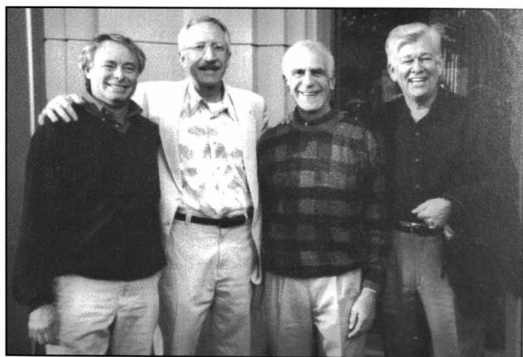

The Class of 1946: L to R: Greg Zotos, Bill Stocker, Rex Witherspoon, Bob Barkelew, Clifford Neill and Jim Baumann.

The Class of 1981: L to R: Steve Bozoian, Lee Hill, David Groenke, Suzanne Gregoire, Yong Park, Brad Russell, Monroe Ginsburg, Suzanne Morganti, Deborah Ziwot and Bob Goldman.

The Class of 1951: Back row, Richard Ellis, Lowell Whitlock, Harold Askew, Lester Page, Jim Lyon, Neal Newton. Front row, Dewey Allen, Les Kreader, Bud Roeder and J. W. McAllister.

A Mini-reunion on the West Coast of the Class of 1971: L to R: Steve Kleinman, Neal Schai, Sandy Wax and Mike Padilla.

The Class of 1976: L to R: Bill Chen, Mike Kutten, Stephanie Zotos-Houseman, Larry Hoffman, Barry Wyman, Ben Goodier, Karl Hussey, Arnie Jacobson, Mike Watson and Duane Keller at their Friday night reunion dinner.

Washington University School of Dentistry Class of Forty

The reunion was the climax as always, held again at the Danielle Hotel in Clayton, Missouri. This was our 61st reunion, attended by the following: Bea and Myron Goldberg,

Theodora, her sister and Nicholas Matsakis, Grace Schmidt and Kermit Westerfeld. Irv Levy's flight was cancelled because of September 11, 2001 attack.

Grace and I visited Lynn Moist, and Helen and Kenneth Marshall. They are doing well.

Theodora and Nick chaired and made arrangements, all very good.

WE THANK THEM
VERY MUCH!

Sorry to report Charles Smedley passed away March 31, 2001.

Kermit Westerfeld

Dental Alumni Cruise

Bill Brandhorst '43 and his wife Emily have suggested that our Alumni Association select one of the trips sponsored by the main campus office of the WU Alumni Association, and join with them for a Dental Alumni Trip.

The trip selected this year is the Lewis and Clark Cruise in the Northwest, May 15-21. We have been told there is still space available.

Relive the days of the early American pioneers, cruising upstream on the Columbia River from the Cascade Mountains into the high desert country of eastern Washington. With jet boats, we will venture even farther into Hells Canyon on the Snake River, the deepest gorge in North America. We will hike where the first settlers camped, discover homestead ruins and abandoned gold mines,

and pass through the navigation locks of eight great dams, with some of the highest lifts in the world.

We'll sail aboard a comfortable, 70-guest expedition ship, *Sea Lion*. Scaled to cater to small groups and to be in harmony with the environments we explore the *Sea Lion* which features fine accommodations, outside cabins, and delicious, varied menus. She carries a fleet of versatile Zodiac landing craft and sea kayaks to take us where larger ships cannot go, for personal, upclose encounters with the beauties of this seldom-visited terrain.

Join us for a unique voyage of discovery. You should already have received the information sheet on this trip, but if you need another one call the Alumni Association at 314-935-5212, or David Jolley at 314-935-5051.

The Kimbrough Trust

For the last eight months, the Executive Committee of your Board of Directors has been pursuing through legal channels at least a portion of a sizeable estate left by a graduate of the Class of 1894, Dr. Joseph B. Kimbrough. The Joseph B. Kimbrough Trust says "Upon the death of the survivor of said niece and nephews and after the death of the Grantor, the property then constituting the trust estate shall be paid over and distributed free from trust unto Washington University, St. Louis, Missouri, for the exclusive use and benefit of its Dental Alumni Development Fund."

It would seem logical that our Dental

Alumni Association could use such funds to sponsor educational programs and meetings and thus carry out Dr. Kimbrough's wishes. The University has not shown itself to be a sponsor of dental education since it closed the school. The Dental Alumni Association would have the means and talent to sponsor outstanding educational programs were the estate to be awarded to it. In fact, we have applied for a tax exempt status and as soon as we build up our treasury; an excellent dental meeting could be presented each year. Additional donations could be directed to the Association instead of to the University.

Shepard Lecture

Wilma and Earl Shepard Dental/Otolaryngology Memorial Lecture Series

Speaker - Dr. Terry Ress,
Chairman of Stomatology
at Baylor Medical Center,
Dallas, TX

Wednesday, April 10, 2002
